Dr. Joseph V. Brady  
Deputy Director, Division  
of Neuropsychiatry  
Walter Reed Army Institute  
of Research  
Room 352  
Washington, D. C.

Dear Joe:

Thank you very much for spending the time with me on our problems. As I indicated, I will be in touch with you within a month. I wish to remind you that we are looking for research-oriented and experienced scientists in two areas; namely, bioengineering with heavy emphasis on the engineering side, and an experimental psychologist strong in experimental methodology and in computer analysis of statistical data. Should you come across some promising candidates, let me know and I will follow them up.

Best regards,
